Project Information (Fill-up by Student)

Project Title: 3D Color Road Game

Features & Description

It is a game-based application where a ball has to cross the road by match color. Each time when the ball crosses the road safely, score board will updated and get +10 point. Each time ball crosses the road, the speed of coming roads will be increased. If ball hits in a wrong color road then the game will be over. It is made for children and we think that they can enjoy the game.
